DOUBLE LEGAL STAMPS EVERY DAY UNTIL 12 O'CLOCK NOON

BABY GIRL PLAYING NEAR HOME KILLED BY AUTO

Evelyn Murphy, Motherless Victim of Tragedy in East Boston. AUTOIST GOES TO STATION Allowed to Go After Story to Police; Investigation in Under Way.

LITTLE Evelyn Murphy, a three-year-old, blue-eyed, brown-haired child was run down by an automobile owned and operated by W. H. Chadwick of No. 142 Bellflower avenue, Dorchester, opposite her father's home at No. 23 Berwick street, East Boston, at 5:30 o'clock yesterday afternoon and died within half an hour after being taken to the Relief Station in that district.

Mr. Chadwick for about thirty years has been in the carriage business in South Boston and Massachusetts streets in this city, but retired three years ago. His daughter, Miss Lena W. Chadwick, was with him when the scene of the accident occurred, and accompanied him to the Relief Station last evening. He was not allowed to go after the story to the police; investigation is in under way.

He told the story yesterday to Lieutenant O'Neil, after the child had been buried by his daughter, the Relief Station headquarters. He was instructed to go to the station and wait until the child was taken to the station and the police investigation was completed.

Death Interrupted Play. Coroner Murphy, who had the child laid out last night, had been told by neighbors who saw the accident that the child was killed by a car. The child was playing on the sidewalk near her home when the car came along. The car was driven by W. H. Chadwick, who was the father of the child.

CHILDREN TO PARADE. Holy Family Temperance League Expects 15,000 in Line. The annual parade of the Holy Family Temperance League will be held in Boston, Wednesday afternoon, and it is expected that 15,000 children, boys and girls, will be in the line of march.

ASK VOTES FOR WOMEN. Suffragists Invade Bedford in Auto to Make Speeches. A yellow banner with the inscription "Votes for Women" followed from a large automobile which dashed into the town of Bedford yesterday afternoon. The auto contained a number of suffragists, who have been active in making campaign for women's suffrage.

FOR FIVE YEARS HAD KIDNEY TROUBLE. Was Finally Relieved by Peruna. Other Cases Cited. "I had kidney trouble for five years. Your Peruna was recommended to me and I tried two bottles and was cured. I believe that I am well. I therefore recommend the curative qualities of Peruna," says Mr. Alexander M. Binn, Newport, Michigan.

Miss Coghlan Picks Winners in Love-at-First-Sight Contest

Miss Rosalind Coghlan, leading woman in "The Travelling Salesman," at the Park Theatre.

Before the disappearance of her husband, she was a leading woman in the theatre. She was a leading woman in the theatre, and she was a leading woman in the theatre. She was a leading woman in the theatre, and she was a leading woman in the theatre.

By ROSALIND COGHLAN. AFTER working for nearly a month on the "Travelling Salesman," I have been able to pick out the winners in the love-at-first-sight contest. The winners are the winners in the love-at-first-sight contest.

THE DIFFERENT PHASES. The remaining four scenes I selected as best showing the different phases of the play. The winners are the winners in the love-at-first-sight contest. The winners are the winners in the love-at-first-sight contest.

THE WINNING LETTER. I think the following letter by Mr. Chadwick is the winning letter. The winners are the winners in the love-at-first-sight contest. The winners are the winners in the love-at-first-sight contest.

THE OPPOSITE VIEWPOINT. The second letter I selected shows the opposite viewpoint. The winners are the winners in the love-at-first-sight contest. The winners are the winners in the love-at-first-sight contest.

A COMPREHENSIVE VIEW. The third letter gives a comprehensive view of the entire situation and the winners are the winners in the love-at-first-sight contest. The winners are the winners in the love-at-first-sight contest.

THORNDON HAINS IN HIDING AT SEA

Mysteriously Disappears After Bidding Farewell to Brother in Prison.

NEW YORK, June 12.—Thorndon Jenkins Hains, a novelist, short story writer, and a defendant in the Haines murder trial, has disappeared. Under some other name he is making his living as a writer. He was last seen in New York City, where he was in hiding at sea.

Before his disappearance he was in New York City, where he was in hiding at sea. He was last seen in New York City, where he was in hiding at sea. He was last seen in New York City, where he was in hiding at sea.

WINEYARD GIRLS SEE BRIDAL PAIR SAIL. It was a joy crowd of Vineyard girls that gathered at the White Star Line wharf to see the bride and groom sail. The bride and groom were seen sailing away from the wharf.

SOMERWILLE BELLE DRIES TO MORROW. A wedding which is of interest to the younger set of Somerville and Boston is that scheduled for tomorrow night in the latter city, the contracting parties being Miss Adele and Mr. Charles. The wedding is of interest to the younger set of Somerville and Boston.

MAKE BOSTON IDEAL CITY BEFORE 1915

Chicago Architect Tells What Could Be Done to Improve Its Buildings.

MORE BUSINESS ROOM

Plea for Beautiful Suburbs Where Cheap Homes Can Be Had for All.

Boston has become one of the most cities in the world ever since 1865, the city itself is greatly improved architecturally. This is the opinion of Mr. Henry H. Howard, a member of the Board of Public Works, who came to Boston to attend the Technology conference.

Mr. Howard, who is a young man, is recognized as an authority on buildings of all sorts, although his specialty is in designing modern buildings. Since his graduation from Technology he has designed more than two hundred buildings in all parts of the country.

There are a few of Mr. Howard's remarks for making Boston vastly improved architecturally:

"The business centre of the city should not be confined to the present few blocks, but should be permitted to extend much further in all directions.

"A new city hall should be built on the site of the old Park square station. This would surely tend to improve the Fifth Ave. which is the worst of the city's streets. These buildings ought to be torn down and replaced by buildings of the latest design.

"The thousands of residents of the congested parts of Boston ought to be sent to new cities in the suburbs. The heart of Boston and then new suburbs.

"Tremont and Boylston streets should be lined with modern buildings. From all of a designated height and the new construction. In the way of new features construct buildings on places in European cities. It would be fairly be in the line.

"City's Brilliant Future.

Alfred M. Howard, who is a great deal of interest in Boston, because he is married to a former Boston girl. He feels that Boston has a brilliant future.

Of course it is easy to pick out the best of the city, but when it comes to the future of the city, the future of the city is in the hands of the people.

OLDEST IRISH SOCIETY HAS PRIDE IN ITS ACHIEVEMENTS

James H. Devlin, Jr. (at left), president of Charitable Irish Society, and three prominent members, Charles J. Dwyer, and John J. Keenan (at bottom).

FOUNDED BEFORE REPUBLIC'S BIRTH

For More Than a Century Has Celebrated Every St. Patrick's Day.

THE oldest Irish organization in Boston, and probably the oldest in the United States, is the Charitable Irish Society, which was founded in this city almost a generation before the republic was born. The actual date of its birth is March 17, 1777.

From the hour of its organization, in the days of the Massachusetts Colony, down to the present, the Charitable Irish Society has had an interesting and highly honorable career in Boston social life. It was founded to alleviate suffering and to aid the poor, and it has since that time been engaged in the most noble and generous work.

The first president of the Charitable Irish Society was William Hall. The first president since then has been John J. Keenan, who is now the president of the society.

The society has a long and honorable record. It has been the first to give aid to the poor, and it has since that time been engaged in the most noble and generous work.

MELROSE BOY JOINS GRAND OPERA STARS

'Spotless Town,' Home of Miss Farrar, Adds Another to Famous List.

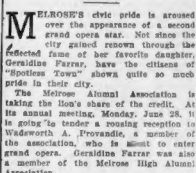

Photo by Photo Studio.

MELROSE's civic pride is aroused over the appearance of a second grand opera star. Not since the city gained renown through the fame of her favorite daughter, Geraldine Farrar, have the citizens of 'Spotless Town' shown quite so much pride in their city.

The Melrose Alumni Association is taking the line's share of the credit. At its annual meeting, Monday, June 28, it is going to tender a roving reception to the new opera star, Miss Farrar, a member of the association, who is about to enter a career of conquest. Miss Farrar is also a member of the Melrose High Alumni Association.

For the past few years Mr. Provandie has been winning fame with a rare talent. He has attracted the attention of the Director Henry Russell of the Grand Opera Company, and he has been chosen to play the role of the Duke of Mantua in the opera 'The Two Pages' by the Grand Opera Company.

Whether the Melrose lad will accept is another question. He will probably do so, and will make a tour of Italy this fall. He will be accompanied by his mother, Mrs. Provandie, and his sister, Miss Provandie.

Mr. Provandie's repertoire includes many famous roles, and he is a member of the Grand Opera Company.

BOSTON COLLEGE TO NEW WORLD RECORD OBSERVE FEAST DAY BY BRITISH FLEET

Students to Receive Communion Wednesday; Program for Commencement Week.

The students of Boston College and of the high school department will go in a body to communion next Wednesday morning in the Church of the Immaculate Conception. On that day they will celebrate the feast of St. Ignace.

The final examination of the school year will take place at the college on Tuesday. On next Sunday the exercises of commencement week of the college will open. There will be a graduation service in the church on that evening beginning at 7:45 p. m. The Rev. Francis J. Hall, rector, will officiate.

The high school department graduates will include a debate, a soliloquy and a valedictory, on Monday evening, June 21. In the college hall, the Rev. Francis J. Hall, rector, will officiate.

The subject for debate is: "Resolved, that women should have the right of suffrage." The speakers will be Edward A. Sullivan, '09, of Cambridge, and Francis C. Sullivan, '09, of Cambridge. The soliloquy will be by Francis C. Sullivan, '09, of Cambridge. The valedictory will be by Francis C. Sullivan, '09, of Cambridge.

MISS TOPPAN BRIDE
OF BENJAMIN HURD

Brilliant Wedding Ceremony
Takes Place in Christ
Church Cambridge.

The bride wore soft white satin trimmed with beautiful creamy lace. She carried tiles of the valter and had cream blossoms tucked into the veil. The maid of honor was Miss Margaret Tappan, and both she and the bridesmaid, Miss Harriet Carr, wore soft pink gowns and tie a delicate lace profusely trimmed with deep blue ribbon. The bridesmaid, Helen Page, the tiny flower girl, and white muslin and carried a graceful basket of white daisies.

The best man and the ushers were F. W. Fuller, Russell Parich, Charles F. Tappan, E. Saltzberg, Bruce,

[illegible]

and Mrs. Longfellow, and many others from Cambridge, Boston, Newton, Brookline and New York.

After the wedding a large reception and breakfast was given at No. 54 Highland street, the home of the bride's mother, Mrs. Robert N. Toppan. When Mr. and Mrs. Hurd return from their wedding trip they will live at Nutley, N. J., a suburb of New York, where Mr. Hurd is, in the electric supply business.

WOMEN FORESTERS
APPEAL TO COURT.

Suit Entered to Restrain High Chief Ranger From Paying Counsel Fee.

The new Pilgrim Memorial Monument at Provincetown is rapidly nearing completion. The massive granite pile towers fully 200 feet above the foundation already and at least 300 feet above the sea level. Its extreme height will be 250 feet, when completed, and the top can be reached by

What's the Use of Fighting If You Can't Fight all the Time

That's the idea exactly. We would not have

thought of quitting at any stage of the game. First they cut the price of the cutting machine out of the business. But that was years ago. We have been fighting ever since, and winning. We have had cutting machines cutting and scalping and slashing at Trust Paint. Once when a particular customer of the Trust was fighting us for a customer who wanted to buy said scrapper member's piano for piano, he gave the customer a piano and paid the cartage to boot. It cost us a pretty penny of it. But he couldn't get a better bargain, but the waste of fighting if you can't fight all the time! Don't start anything that you can't finish. You're going to finish it. And then you'll see the prices of places down where they belong - where we've had them for years. Don't cut the woad and the grass. You'll be left with the grass while the bear is dying. 98 beatules will be put on the sacretion road.

CUT PRICES

The pittet pins come, with their cost ap-

\$5 DOWN--\$1 a week economical piano buy to go. Take the trouble to look around a little—go up where the rents are not so high—and buy your piano right.

GEORGE PLOTIN HOWARD GOULD CASE

Young Millionaire Will Be Accused of Fake Evidence Against Actress Wife.

NEW YORK, June 17. There are indications that the situation and attorney of Mr. and Mrs. Howard Gould will be in a position to make a strong case for the defense of the young millionaire. According to reports put out from the Gould family, Howard Gould will be charged with an attempt to manufacture evidence against his wife. The Goulds are said to be in a position to make a strong case for the defense of the young millionaire. The Goulds are said to be in a position to make a strong case for the defense of the young millionaire.

George Gould in Case.
The confession was first made to Mrs. Gould after Gould had gone for advice to his father, the late Mr. Joseph Gould, of St. Louis. Mrs. Gould's attorney, Mr. J. E. Kennedy, a former associate of the late Mr. Gould, is said to be in a position to make a strong case for the defense of the young millionaire. The Goulds are said to be in a position to make a strong case for the defense of the young millionaire.

Inquiry Ends in Wedding.
There was a thorough investigation of Mrs. Gould's past but it came to naught. "The Bill" Hawley served his term, and Howard Gould is said to be in a position to make a strong case for the defense of the young millionaire. The Goulds are said to be in a position to make a strong case for the defense of the young millionaire.

LYNN DEATH TRAPS ARE TO GO AT LAST

LYNN, June 12.—After five years of constant agitation the first action toward the abolition of the deadly gingham traps in this city was taken today when the special grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter.

With several fatalities annually, in some years averaging one death a month, the total of lives lost to the Boston and Lynn traps is said to be about 100. The grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter.

The grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter. The grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter.

On the basis of an estimate of \$100,000 as the cost of the work the Boston and Lynn traps are said to be about 100. The grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter.

MYSTERY IN \$1,000 GIFT.
DES MOINES, Ia., June 12.—The people of Des Moines, who are puzzled over the receiving by their city of a gift of \$1,000, are said to be about 100. The grand jury, composed of the Hon. Superior Court judge, a justice of the peace, and a member of the grand jury, met to consider the matter.

The Height of the Year's Showing in The Filene Machine-Made Dresses

(Trade Mark Registered)

From 1.00 to 7.50—No Higher

In no department of our business have we rendered more genuine service to the community than in our Machine-Made Dress Department.

In this section of our business we are producing genuinely artistic dresses at such low prices as to result in freeing a great number of women who, until finding Filene-Machine-Made Dresses, have preferred the drudgery of making their own dresses to buying the cheap-looking and shoddy dresses usually sold at a low price.

The low prices at which these dresses are sold are possible only because we have built up such a big business in them.

For this reason the cost of designing is so widely distributed that it amounts to only a few cents on each dress. We keep our styles from becoming common by the use of exclusive materials changed as often as possible.

1.—Designed by designers of the highest type dresses.
2.—Made by thousands, all by machine—even the sewing on of buttons.
3.—Cut out by electric knives.

4.—Materials bought from the mills in bulk, saving many cents on each dress.
5.—Styles and materials are changed constantly so that none can become common.

A 1910 Forecast

You may—and you may not—be wearing next year a dress like the forecast for 1910. It occurred a lot of comment, because—designed, as were the others, by an authority on fashion and dress—it shows in many ways the natural culmination of the present tendencies in dress.

Early Closing Notice

In accordance with the long established practice of all Boston's first-class houses, to give employees benefit of shorter hours during the hot summer months, this store will close on Saturday June 12th and will continue to be open on Sunday, June 13th.

Saturdays at 1 P.M.—Other Days at 5 P.M.

Patrons are respectfully requested to co-operate with us, in favor of our employees, by shopping early, especially on Saturday morning.

Balance of the "Castle" Hats

Last Monday saw the most phenomenal selling of hats ever experienced in Boston. Customers were simply astounded at the remarkable bargains. Now to make a quick clearance of the balance, we offer even greater bargains for this Monday. To accomplish this end we have divided all the trimmed hats regardless of former prices or value, into two lots, as follows:

Trimmed Hats
That Earlier in the Season
Were \$3 to \$4, at

98c

Trimmed Hats
That Earlier in the Season
Were \$5 to \$6.50, at

1.98

Great variety of brims in smart up-to-date shapes, trimmed with French wings, roses and great variety of fine flowers.

All the Untrimmed '1 to '3 "Castle" Hats at—
including several hundred which, for lack of room, we could not show last week—scores of smart, unique, exclusive "Castle" blocks—shapes that you can't buy elsewhere in Boston—chips, milans, Javans, many in two-toned effects—and dozens of styles in rough braids. Earlier season prices from \$1.50 to \$3.00. Unlimited choice in one big lot. Monday at—

25c

Milliners and Small Dealers bought these hats by the dozen last week, and will make 100 per cent. to 300 per cent. profit on them. Plenty more for you if you come early Monday.

Another Sensational Sale

Of Women's Silk Dresses for Monday

585 Beautiful Silk Dresses

**Not One in the Lot Worth Less Than
\$16.50 and Others Range up to \$30.00
All to be Sold Monday**

At \$9.75 Each

They include an exceptional assortment of Pongee Dresses, Foulards, Taffetas—Plain, Striped and Checked Effects—Messalines, Satins and Other Equally Desirable Materials

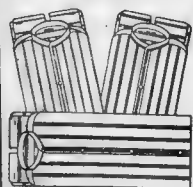

All the smart shades of the season, and in the lot are 75 Natural Shantung Silk Dresses, not one of which is worth less than \$25.00 to \$30.00. Also 75 Black Silk Dresses that are unusually desirable. All sizes from 34 to 44 inches.

The Silk in These Dresses cost more than we ask for them, and the making by any ordinary dressmaker would cost you double the price. You will long remember the great bargain of two weeks ago when we sold 1000—\$15 to \$20 Silk Dresses for \$8.00.

These Are Still Greater Bargains

So try and come in early Monday morning as soon as the store opens, 8:30. You will get the first pick and quicker attention.

The Best Lot of Men's '1.00 Negligee Shirts 79c

Negligee Shirts
We Ever Offered at

And that is saying a good deal, at least judging by the enormous sales, and "deeds speak louder than words." 100 dozen shirts sell out in no time when we offer such great bargains—Better be on hand early Monday.

The swiftest patterns of the season; the new Taupe colored shirts with distinctive looking stripes in great variety (three like the illustration), plain white shirts, new black and white patterns, in fact every kind you can think of. Made cost model, with attached cuffs—cut full size, perfect fitting shirts, first class in every way, and all sizes from 14 to 18.

Worth \$1.00 of Any Man's Money—And Many Will Buy a Summer's Supply at This Sale

Men's Finest '1.50 Union Suits for 79c
We have just purchased all the manufacturer had of this high grade Union Suit. Were we allowed to use the maker's name, this purchase would all sell out in an hour, so great is the demand for this particular make. In fact, the manufacturer is so particular that he has taken the label off each garment, so that this well known brand may not be known at a cut price. But you will quickly recognize the fine quality and the extraordinary value, subject to the slightest manufacturer's imperfections, at—

OUR GREAT JUNE WHITE SALE

Shows our prices to be decidedly lower than anywhere else in Boston.

This is of the greatest importance to every New England woman, for the possible savings on a summer supply amount in many cases to ONE-QUARTER, ONE-THIRD, AND EVEN ONE-HALF.

Mammoth new purchases of Women's and Misses' Undermuslins, Negligees, Wear and Waists, as well as Infants' and Children's Wear, give you

10. His work of the afternoon ordinarily
11. did have you very content, but not with
12. out work of supper. Just like Mr Berger,
13. who did not allow two bits to be gotten
14. any one thing, and he deserves much
15. credit, as all the fans who saw the game
16. saw.

RED SOX FAIL

TO SCORE IN
SECOND CONTESTPIRATES WIN 12TH
STRAIGHT VICTORYSuperbas Walloped by Buc-
caniers in Second Game of
Series by Score 10 to 1.

PITTSBURGH, Pa., June 12.—Pirates scored the twelfth straight victory by beating the second game of the series from the Boston Red Sox by a score of 10 to 1. The win was the first since the team's arrival in the city, and the first since the team's arrival in the city.

The game was played at the Red Sox's home ground, the Huntington Avenue Grounds. The Pirates, managed by Fred Clarke, won the game by a score of 10 to 1. The Red Sox, managed by Harry Frazar, lost the game.

The Pirates scored in the first inning, and then in the second, third, fourth, fifth, sixth, seventh, eighth, ninth, and tenth. The Red Sox scored in the first, second, third, fourth, fifth, sixth, seventh, eighth, ninth, and tenth.

Giants, 3; Reds, 0.

CINCINNATI, June 12.—New York's defeat of Cincinnati today in a game that for good playing, fast basing and general excitement has not been equaled on the local ball scene. It was a masterpiece of play, and the home team, the Giants, won by a score of 3 to 0.

The game was played at the Cincinnati Red Sox's home ground, the Huntington Avenue Grounds. The Giants, managed by John McGraw, won the game by a score of 3 to 0. The Red Sox, managed by Harry Frazar, lost the game.

Phillies, 3; St. Louis, 2.

ST. LOUIS, June 12.—Pitcher Lee of the Philadelphia Athletics won the \$100 bonus for defeating the Cardinals in the second game of the series by a score of 3 to 2. The win was the first since the team's arrival in the city, and the first since the team's arrival in the city.

The game was played at the Cardinals' home ground, the Huntington Avenue Grounds. The Athletics, managed by John McGraw, won the game by a score of 3 to 2. The Cardinals, managed by Harry Frazar, lost the game.

Rockport, 6; Winthrop, 5.

ROCKPORT, June 12.—Winthrop's last game in the annual series was the one which Rockport had to win, but the team was defeated by a score of 6 to 5. The win was the first since the team's arrival in the city, and the first since the team's arrival in the city.

The game was played at the Rockport's home ground, the Huntington Avenue Grounds. The Rockport team, managed by Harry Frazar, won the game by a score of 6 to 5. The Winthrop team, managed by John McGraw, lost the game.

Lincolns on Top Again.

The Lincoln Club won their fifth straight game by defeating the Crookston Club by a score of 10 to 1. The win was the first since the team's arrival in the city, and the first since the team's arrival in the city.

The game was played at the Lincoln Club's home ground, the Huntington Avenue Grounds. The Lincoln Club, managed by Harry Frazar, won the game by a score of 10 to 1. The Crookston Club, managed by John McGraw, lost the game.

SIDNEY SMITH

Notes of the Red Sox Game

The series stands 2 to 1, in favor of the Sox.

Clothe pitched a grand game, and ordinarily would have been a star.

Lord did the star attack work, getting the Sox out of the game.

Roch a bunch of errors. Five in the first inning.

Hull got a hot throw from Clothe on the end of his fingers in the ninth.

Helle Heger, but the Sox pitcher was not in the game.

Hull made the first hit of Berger. He sent a high bouncer which Helle got on account of.

Some pretty hitting was pulled off in the second inning when Walter grounded to Helle.

In the midst of the bugs there will appear the reminiscence of the battle.

City Point is Blanked.

The starting A. C. won their twelfth consecutive game yesterday by defeating the City Point Athletics of South Boston at the Columbus avenue playground, 10 to 0.

The City Point team, managed by Harry Frazar, won the game by a score of 10 to 0. The Athletics team, managed by John McGraw, lost the game.

Lynn, 12; Haverhill, 2.

AL KAUFMAN.

In the Rue de la Paix, and on the morning of the luncheon the Prohmanns and the Hirtzes found an astonishing number of guests. The guests were all invited by the Hirtzes, to take them to the apartment in the Rue de la Paix, and to the garden and introduced into the house. The butler, a French and apointed parlor entered with a tray bearing cocktails. The Hirtzes and the Prohmanns were the parlor maid and noticed that she was a French girl. The Hirtzes were shown into the breakfast room and then all were at the table. The Hirtzes were a French and a British couple and a laughing and a French couple. The Hirtzes were shown into the breakfast room and then all were at the table. The Hirtzes were a French and a British couple and a laughing and a French couple.

League to Give Concert.

The Women's Municipal League will give a concert in Franklin Union hall, corner of Webster and Adams streets, tomorrow evening at eight o'clock. The concert will consist of vocal and instrumental solos and piano pieces by Miss Downes.

WOULD DIVIDE TEXAS

It is reported that the United States government is planning to divide Texas into two States as the result of a recent survey. The plan has been started here at a secret meeting of saloon men, as a solution of the long question. North Texas is strongly pro-secession, while South Texas is equally so against prohibition.

The vigorous prohibition campaign started against saloon men by the anti-Saloon League already has legislated on these 800 million miles of southern Texas having been extended to him by the club in the company of five councilors of the chamber of commerce. The plan, which was to have been carried out by Messrs. Elm, Hill and Dochow, the three members of the anti-Saloon League, all of whom are working for the overthrow of prohibition.

To further the plan for the event a meeting of the various sub-committees will be held at the club house, Pearl and Main streets, Fort Worth, next Friday night. President John W. Downes will preside, and the report of the anti-Saloon League will be read.

TO BE CONTINUED IN MONDAY'S TEXAS AMERICAN.

Sign Posts to Success

YOU MUST SUCCEED ALONE—BY HERBERT KAUFMAN

You say that you *deserve* success—then prove it. We're sitting in the jury box waiting for the evidence—ready to be convinced—willing to grant you what you *deserve*, but neither anxious to help nor to hinder you.

Present your facts—show results, but don't rest your case with words.

Your personal opinion is of absolutely no moment; it's bound to be biased. Try as you may, you will look at yourself through the glasses of self-interest—you will exaggerate your importance.

We refuse to accept the measurement of your own scales; they can't be honest. Conceit and egotism are helping to weigh down your side. You're prone to mistake the desire for the ability to accomplish—inclination is apt to color your judgment.

We're cynical? Why not? Since the beginning of civilization we have seen most men over-reach themselves—the memory of the world is scarred, and each scar represents an experience with shirkers who posed as workers—with weaklings who attempted beyond their strength.

Most of the world must serve—only a few can command. Unless we are impartial and remain judicial, we will have chaos. Men must adjust themselves to their proper relations to the rest of society. Progress is the result of elimination.

The only way that you can find your exact measurement is to jump into the sieve—it can't cheat. If you're big enough, you won't slip through the mesh, but if you're chaff you must be sifted out.

Democracy has made of life an open game—in a free field. There are no boundaries or fences, except for those who *deserve* constraint and for those who have not the power to climb over the barriers which segregate servant from master, follower from leader.

The world wants its powerful sons—and the only way they can be found is to set them among their fellows and have them demonstrate their supremacy by the contrast. No other test would be a true or fair one.

Leaders are not discovered; they prove themselves. Power is not bestowed—it is not a giving—but a gift.

We've equalized opportunity. This is the most that society can do; it cannot equalize men.

If you are lacking in courage and grit and mentality—if you are twisted or warped—if the vital impulse of attainment is not bred in your bones and surging in your blood, all the legislation and help between here and Mars can't more than prop you up.

And we refuse to prop you, simply because the other man can't have what belongs to him if we handicap him by giving you assistance and demand that he look out for himself.

We don't care what your parents were—we only wish to know whom and what you are—what you can do and how honestly you will do it.

You can have anything if you are shrewd and tenacious and lasting enough to reach it, but you must attain ALONE.

You must fight for your place, but you must fight fairly and under the rules. If you break them, we'll break you.

(Copyright, 1909, by Herbert Kaufman.)

Editorial and Literary Section

THE MAD RUSH UP THE LADDER AND THEN

A MAN who had cornered the wheat market, raising the price of bread, and almost bringing starvation upon thousands of better human beings, had the insolence to give a set of rules for "success."

Success, to him, meant money, no matter how got. Success to the burglar means plundering other people's houses and evading the police.

Success to the assassin means killing the object of his hatred and escaping punishment.

Success to the manufacturer who employs child labor means getting rich out of the blood and muscles of the only really innocent and beautiful creatures on the earth.

On this page have been many editorials on success. But it is a different kind of success from that defined by the wheat speculator glutted with money that he got by impoverishing his fellow men.

In this cartoon is pictured a multitude of people, rushing madly up a ladder. All are eager to get to the top. They crowd and jostle one another. Like cattle in a stampede, insane with haste and excitement, they press forward and upward.

They tread on others as they pass, and do not care. They tear down others who have climbed farther than they. All about them is the turmoil and confusion of the mad struggle—wetting their excitement, adding to their blind desire to go on.

And in that crowd there is probably not more than one man who knows where he is going, or why he is striving so madly to gain a higher place on the ladder.

Sunday, when we rest a little from the weary struggle for existence and what we hope to make of it, it is worth while to consider just what price we are paying for success, and whether, at the price, the kind of success we are seeking is a good investment.

A man living to the age of seventy has his full share of life. A few there are who reach an older age. Countless others die before they are fifty.

It is desirable to have money, and power. Without money one becomes dependent, and dependence is misery.

Without power one becomes subject to the power of others, which is merely a legal sort of slavery.

Every man should try to get far enough in

the world to achieve an honest independence.

If every man were satisfied with that, there would be no stampede up the ladder of success—no crowding and pulling and rearing, no advance by putting others back, no rioting at the price of the heartbreak and despair of other men.

But in human nature, in its present state of development, selfishness is the dominant trait. It is selfishness that makes disagreements between men. It is selfishness that brings about the abuse of power, the greed for useless wealth, the desire for things that other men have earned and have a right to enjoy.

Selfishness prompts the rich and powerful to corrupt judges and bribe legislators in order to gain more wealth and more power.

Selfishness drives the infamous employer of child labor to his rascally business of stunting and starving innocent childhood.

Selfishness moves the wheat speculator to corner the market, so that out of the higher prices for bread extorted from hungry millions he can gain a profit and retire to another country to enjoy himself.

Were it possible to eliminate selfishness, this would be a very different world.

But the quality is inborn. Implanted originally in human nature to inspire a man to protect himself against ferocious and unreasoning foes, it has been the most stubborn survivor of all the animal traits in man.

We cannot eliminate it from other people. We cannot eradicate it from those we know best.

But we can control it in ourselves, and by legislation and restriction we can check it in other men when it is carried to criminal extremes.

Any man climbing up the ladder to success can pause now and then and reflect what kind of success he is aiming for and what price he is paying for it.

Whatever success it may be, it is too costly at the expense of health.

To gain great wealth, exchanging for it a good constitution, is a bad bargain, as many dieting, milk-drinking millionaires will tell you.

To gain it at the expense of life itself is a waste of the greatest gift of the Creator. Man was not meant to kill himself, striving for money or fame, but to live in the world and help to make it better.

To gain success by breaking down the mind is as foolish as killing one's self in the same pursuit. More pathetic even than the sombre funeral that tells of a money-grubber are the grim asylums, inside whose walls walk crea-

tures with the faces and figures of human beings, but with blank or unsettled minds looking out of the staring eyes.

Let us admit that money and power are desirable. But it must be added that they are only desirable for the ability they bring to help other men.

But money and power are not real success. And real success is the only kind worth having. Money is merely incidental to it. Power is but a factor in it.

Real success can be obtained without pushing other men down, without envy, without malice, without fury. It CANNOT be obtained without a PURPOSE, and a definite purpose.

The man who goes along with the stampede, running forward because other men are running forward, shouting because other men are shouting, and exhausting himself because he sees other men, wearied and panting, climbing beside him, needs now and then to stop and think about the end of it all.

The stampeding trail we have in common with cattle and sheep. There is nothing noble about it. There is nothing worthy of the human understanding about it. It brought home to us when there is some great disaster, when thousands of people rush frantically toward what they think is safety.

Then it is that the weaker lose their reason and self-control. Then the dreadful cruelty

of cowardice is seen in all its naked brutality. Perhaps in times of panic there is some shadow of excuse for the disregard of others.

But there is no excuse for it in the chase after success. No success is worth that price.

Resting, this Sunday, from your exertions, it will pay you to analyze what you have been doing and the motive that prompts your desire to get to the top of the ladder.

Is it money? Money, as we have said, is worth getting—that is, enough of it to bring independence. Industry will bring it, industry guided by careful thought.

Is it fame? Fame is worth nothing—of itself. It is valuable only in that it stands for something worth while accomplished.

The fame of Napoleon will last for ages; yet it is not to be compared in value to the fame of Darwin, or Huxley, or Washington.

Napoleon, moved by selfishness, changed the map of Europe and caused the wholesale murder of armies of men. His life made men think a great deal about the foolishness of kings—in that it was useful. It taught men that what one could do for purely selfish motives they could do for higher motives. In that again it was useful.

But Huxley and Darwin taught men to think, to make of their minds the marvellous organs it was possible to make of them. The world had advanced rapidly because they lived. Many thinkers have followed in their

One Kind of Success Is Worth While—No Success Justifies Treading Down Other Human Creatures.

footsteps, inspired by their teachings and their labors.

That sort of fame is worth having. And riding ahead over other men is not a necessary part of gaining it.

Washington, a thinking man and a fighting man, dealt the heaviest blow to the divine-right nonsense that had been given since the world began.

There, too, is a fame that may well be emulated. And it may be emulated without selfish and remorseless pursuit of a misty, half-understood success.

Try to-day to get out of the herd for a little while. Let human cattle follow other human cattle, mad for something they call success—caring nothing as to how it is gained, just so it is gained.

Think what kind of success you want, and how you will get that success.

Aim at serving other men—at doing something for the human race, in science, in art, in politics, or, if necessary, in war.

But keep out of stampedes. At the top of the ladder is—you do not know. It will not be given you to know till you get there.

But you do know that by industry, by thought, by respect for the rights of others and a desire to do your full share of what is to be done in the world you can find happiness, and happiness is enough of success for any man.

Act as an individual when it is possible. When you need co-operation, try to get the co-operation of others, or join with others who are working for an honest purpose.

Take an interest in politics, which is the science of living at peace and unity with your fellow men. Be as little selfish as you can be. And remember that when the climb up the ladder is ended, whether you are at the top or at the bottom, you will be judged according to the way you have dealt with those whom you met on the way up.

WHERE BRUTUS CONDEMNED HIS OWN SONS TO DEATH.

THE CONSUL
BRUTUS
CONDEMNING HIS
OWN SONS TO DEATH
FROM THE PAINTING BY
J. LEYBURN IN
THE LOUVRE

**DISCOVERY OF THE RUINS OF THE TRIBUNAL MADE FAMOUS FOREVER
BY THE UNSWERVING JUSTICE OF THE "STERN ROMAN FATHER."**

NO escape to the whole history of Rome is more moving and impressive than that in which the Consul Brutus is represented as condemning his own sons to death. The American tourist in Rome may now stand upon the exact spot where this most impressive of all scenes occurred, and look at the very stones upon which the characters concerned in it trod, for the foundations of the tribunal from which Brutus condemned his sons have been discovered in the Roman Forum. From beneath the surrounding soil and debris considerable portions of the massive stone chair and pedestal that formed the tribunal have been recovered, and it is now possible to reconstruct it just as it was when Brutus sat in it. This structure lies between the Basilica Julia, built by Julius Caesar, the Equestrian statue of Domitian, and the Laocoeus, where the legendary hero of early Roman history threw himself,

fully armed, into a yawning chasm in the Forum to close it up. Lucius Junius Brutus is one of the most typical heroes of ancient history. It is he who gave rise to the proverbial expression, "A Roman father." His mother was a daughter of Tarquinius Superbus, the last of the Roman Kings, and at his father's death his share of the family wealth. This naturally led to a feud between the Tarquin and Brutus families. Brutus escaped from the Tarquins by pretending madness of intellect, whence his surname "Brutus," a defect which he assumed with a view to his present security and future revenge. His opportunity came when Sextus Tarquinius, the son of the king, attacked upon Lavinia, the daughter of Brutus. The husband and family of Lucretia raised a

(Continued on Next Page.)

WHAT A BOA- CONSTRUCTOR TAUGHT ME.

A PHYSICAL CULTURE LESSON
BY
MRS. ELI SHELBY HAMMOND.

"I draw the golden rays down to me."

WOMAN and the serpent have long Hammond, widow of a rather famous been associated, one with the other. Federal Judge for the Western District. Eve started the fashion, and Lilith of Tennessee, to take the serpent, as the before her, say the Arabians. Cleopatra exemplar, for her creed upon beauty was the aspect of the Nile. "Go to the box constructor and be it has been left for Mrs. Eli Shelby Hammond."

By Mrs. Eli Shelby Hammond.

A BOA taught me privy us of beauty. I have no wrinkles. I take notice of my throat—it is smooth. I repeat my fingers, to and round. I let us go back to the serpent. No, I must on second thought, let us speak of the was graceful. I let the rule. Then, hunting dog, who comes into the house after a long run in the open air, He throws himself down upon the floor. Ob- wind their, coil on coil. I want home had practiced it, lying on a rug in the middle of the floor. It was wonderful—a revelation. What rest—absolute relaxation. We need to it signified was perfect ease of mov- study the lower animals in order to learn the right way to relax. Highly as we in imitation, I go through this per- have developed the gift of reason, we formance I try to feel and to realize that I am that serpent.

Watch my finger. See it wriggle. It is a little worm, going out in the morning to drink a cup of dew. It is the art to a great extent. We don't get signifier progress, vitality, exercise of as much air as we require. When one useful function. Considered merely breathe, one should get rid of all the as a finger, its wriggling feeds the muscles of the finger, as well as those of the hand and arm to which it is every breath we take. This means not attached. See what I mean?

What is true of the little worm is true also of the boa-constructor. What is true of the finger is true likewise of the whole body. The snake, by coiling and uncoiling, develops all the elements of its complex muscular system. In like manner, when I imitate the serpent, develop all the muscles of my own body. But the serpent's movements are accom- plished with an absolute minimum of exertion—with the least, imaginable expenditure of force. Hence their value as an object lesson.

Another thing—use light rubber spheres for exercise; heavy ones do not.

Let every muscle join in the rubber spheres. Most of us are continually wasting energy. We throw it away recklessly, not realizing that we are robbing our- selves of vitality. We use even the mus- cles of our faces with such indiscretion that they fall into ugly wrinkles and de-

"Dance in flowing draperies—imitating the curling of the serpent."

The Graceful Curves of the Boa Constructor, from Which Mrs. Hammond Evolved Her Theory.

to envelop me wholly. Then, as I do so, I say to myself: "I am drinking in the sunbeams through every pore and tissue of my body."

As I immerse myself in the fluid air filled with golden rays I am overcome by a sensation of joy and thanksgiving. For what should we be so thankful as for sunshine? It is the ex- pression of life—the very life influence. Life is a product of air and sunshine. The very machinery of our bodies is run by the rays of the sun.

What is the greatest dread a woman has as she begins to find herself growing older? Gray hair? By no means. What she fears most is the peculiar baby folds into which the flesh falls beneath the skin. This is an horrible sign of age. It is supposed to be hope- less. The most highly skilled of "beauty doctors" will confess that they can do nothing for it. Nevertheless, the fact is that it is entirely preventable.

Preventable—that is to say, through proper exercise. I have lived quite a

Mrs. Hammond in Two Poses—On the Right Showing Her "Thistle-down" Exercise; on the Left a Method of Breathing.

"I bathe in the sunlight."

Mrs. Hammond Went to the Serpent for Her Creed of Beauty and Health and Tells of the Philosophy She Evolved From Its Coils.

permanent, and the baby effect arrives because the local muscles get no ad- dress. Give them such exercise as I have just described and the mischief will be avoided. Imagination is an immense help in ex- ercises of this kind. I lie down on a rug in the middle of the floor, flat on my back, and imagine that I am reclining on a bed of violets. Extending a hand, with- out effort, I pick two or three of them. Then, lifting my hand, I look upon them with admiration. The gesture, by a reflex in my brain, causes me to feel that I am really admiring them. I put the violets to my nostrils and smell them. Another reflex. Delicious! Next it occurs to me, quite naturally, that I will give the violets to you. In order that you may enjoy them, I do so, and the mental reflex, thus engendered is a feeling of un- selfishness. Here is perfect repose, com-

Where Brutus Condemned His Own Sons to Death.

(Continued from Previous Page.) The Roman Republic was then found- ed, and Brutus became, in 509 B. C., one of the first two consuls. The other being Collatinus. In a conspiracy horrified at their lack of patriotism for the restoration of the deposed Tarquins the two sons were charged with the deed. Brutus was found to be deeply im- plicated, and was beleaguered by his own troops. In his sight, their heads of Roman patriotism that would sacri- fice in front of the tribunal.

The republic was not yet secure, for the spirit that gave Rome the mastery the Strucone made war on Rome to re- store the banished Tarquins to the throne. Brutus met the son of the de- posed King in single combat on horse- back, and each fell by the other's hand. Rome, it stands upon the vestiges of Tarquin was not restored to power, a pavement of variegated marble. An- other thing—use light rubber spheres for exercise; heavy ones do not.

number of years, and yet, as you will notice, I have no more lines for a year, as "the danger of legible, seems to indicate that it was whatever of such disfigurement. My throat is like that of a girl. And why? Simply because every day I exercise its muscles. One of the exercises I will de- scribe to you in a few words. It is accomplished with no other help than that of an imaginary one; yet it is of the greatest value.

"I lie on the floor imagining I am upon a bed of violets."

"Let every muscle join in the play."

My Secrets of Beauty

No. 24.-HOW TO MAKE THE FIGURE BEAUTIFUL,

by **Mme. LINA CAVALIERI,**
THE MOST FAMOUS LIVING
BEAUTY.

Mme.
Lina
Cavalieri.

PHOTO
COPYRIGHT BY
AME. DUPONT INC.

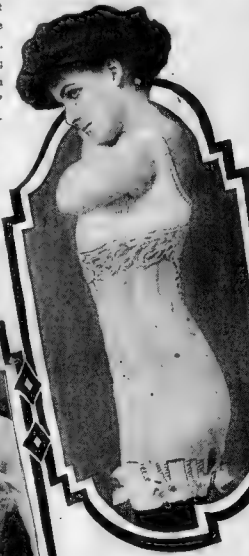

MANY women have attractive faces and unattractive figures. Especially is this true of the woman who is too stout. Mme. Cavalieri, who is not only the most famous living beauty but who is recognized as an authority on the subject of beauty, having studied deeply the subject, has written for this newspaper on "How to Make the Figure Beautiful."

Mme. Cavalieri enumerates the standards of beauty for the female form, then discusses how these standards may be approached by the woman who is dissatisfied, and with good reason, with her figure. Mme. Cavalieri, although of the dreamful Latin race, is exceedingly energetic. Also, she is determined. Although she often says "The easiest way to be beautiful is to be born so," she vigorously meets the plain woman's problem of how to be beautiful though homely, and gives many practical hints for its solution.

Next week Mme. Cavalieri will write on "My Favorite Summer Recipes."

"Every corset should have eight garters. Yes, I mean it; four on each side."

"After exercise and diet for improving the figure, there is nothing so important as to be well corseted."

the action of her physician:

Oil of sweet almonds 100 grams
White wax..... 50 grams
Tincture of benzoin 25 grams
Rosa water..... 25 grams
Tannin..... 15 grams

After exercise and diet for improving the figure, there is nothing so important as to be well corseted. If possible have your corsets made to order. Pay less for a gown if necessary to order a better corset. Get one that is pliable and hygienic and yet moulds the figure into its best lines. To fit well the hips should be the first consideration. The rest of the body can take very good care of itself. Yet the corset should not be too tight about the hips nor abdomen. For this reason I always advise that there be rubber webbing in the sides of the corset.

Every corset should have eight elastic garters. I mean it—four on each side. These elastic net only hold the hose in well, but they hold in the abdomen and hips. The first pair of elastic should be fastened directly in front, on either side of the steel fronts of the corset. The next pair should be about an inch, or on a very stout woman two inches, to the right and left respectively. The third pair should be directly over the hips. The fourth should be at the back. While at first this mass of garters seems a hopeless tangle, one soon acquires the knack of fastening them. They add much to the original and tasteful that contribute elegance to the figure.

The fourth desideratum is a good corset. Keep the shoulders and abdomen back. Keep the bust and the chin up. Swing the hips well forward when you walk. Observe all women who are stout, that is, heavily stout. There is no distinction. Women may be stout and yet carry their bodies as though they were lightweight. Others of no greater bulk walk as though they were weighed down with invisible handicaps.

For the heavily stout woman walks with her hips back. In this faulty carriage lies much of her awkwardness and apparent weight. Walk on the balls of your feet lightly. This becomes a habit that renders a woman graceful and almost without apparent weight.

For the constitution of women who have shapely figures, though built upon a simple scale, let me quote this dictum of an authority on woman's beauty: "If, in the state, but the shape that counts. Proportion is the thing."

medicine. I have never advised reduction remedies to be so taken. By absorption, however, I consider this to be a good remedy for over-development:

Oil of sweet almonds..... 4 oz.
Tincture of benzoin..... 1 dram
Extract of Portugal..... 6 oz.
Oil of neroli..... 20 drops
This, too, is a good astringent lotion

Tincture of iodine..... 30 minims
Iodide of potassium..... 60 grains
Distilled water..... 10 oz.
Almond water..... 170 minims

Also this:

Tincture of iodine..... 1 oz.
Alcohol..... 10 oz.

If, on the other hand, the critical side view reveals not only the back and sides as too thin, but the entire outline as too meagre, then this cream, freely applied by light and frequent massage, is an aid in curve-making and flesh-building.

Fresh mutton tallow..... 6 oz.
Lanoline..... 10 oz.
Spermaceti..... 15 oz.
Cocconut oil..... 4 oz.

This, too, is a good tissue-feeding cream

Lanoline..... 60 grams
Oil of sweet almonds..... 40 grams
Tannin..... 1 gram

Women who think their busts are too large write me often asking how they may reduce them. Personally, I do not approve of any treatment, except a general dietary and general exercise, such as tends to reduce all portions of the body. In view of the many requests I receive from concerned women begging such a recipe, I give this European formula, but I protest against any woman using it unless with medicine.

"Keep the shoulders and abdomen back. Keep the bust and chin up."

"Stretching exercises should add somewhat to your height."

Some adventurous women have taken internal remedies under the advice of their physicians, which is the only safe way to take any internal oblique

FRANKLY determine how far your figure falls short of perfection. Perfection, that is, according to the canon of classic statuary. The standards of the Greek sculptors have never been improved. These are their undeviating rules:

The figure should be exactly six times as long as the foot.

The face from the middle point of the hair line to the point of the chin, should be one-seventh of the entire stature.

The hand from the tip of the middle finger to the end of the palm should be of the same length as the foot, and so also one-seventh of the length of the body.

From the highest point of the forehead to the beginning of the chest, should be one-seventh of the length of the body.

If the face from the hair line is the point of the chin is divided into three parts the first line of division is the point equidistant from the lowest points of the eyebrows. The second division line is that directly beneath the nostrils.

The body when standing, with the arms extended horizontally should form a human Maltese cross. The length of the body should be the same as the distance across the body from the middle finger of one hand to the middle finger of the other.

The ideal feet of the sculptors have always been perpendicular, diminishing from a noble width at the foot to a narrow point at the head to a slim delivery of the heel. The trend of feature formation the century of personal dominance is in another direction, toward a widening and increasing of the weight of the jaw. This adds to the impression of strength of character, but it abstracts much from the sum of the beauty of a face.

I have referred to the face because I wish to apply it as a determining factor in judging the beauty of the figure. The sculptor's test of the beauty of a face is its profile. If the profile is strong and beautiful, then the face is equally strong and beautiful. In other words, the beauty of a face cannot exceed that of its profile. As the determining view of a figure as to its beauty or its defect is the profile view. The woman who would improve her figure should study it critically from the side.

For this reason, the woman who sits her easy chair and buys a duplex or triple mirror is an economist of her own beauty.

Determine in what respect your figure varies from the canon of beauty, and try to conform to them. Are you a little too short for the breadth of your figure? Stretching exercises should add somewhat to your height. Bend before the open window, and with hands back to back, the

finger tips touching, rise upon your toes and stretch to your greatest height.

So the woman who would be taller should receive a great deal, take as much sleep as possible. Physiologists have proven that the body is considerably taller in the morning than in the evening. This is because the muscles and joints have relaxed, while during the varied exercises of the day they have contracted. The mass of muscles have much in common with India rubber—they have elastic properties.

The critical view in the duplex or triple mirror may reveal that the figure is too broad or too thick for its height. If too broad the defect is serious, and will be difficult, if not impossible, of remedy. If too thick, diet, exercise or massage, or all of these, may be summoned. Breadth reveals the framework of the body, indicating usually that it is too massive. You cannot change the framework of a bridge, nor yet of the human body. The modification must take place in that which covers it, the layers of muscle and fat. The figure that is too thick, that is from front to back of waist, or from the middle of the spinal column to the point of the bust, may be materially improved.

For this improvement I would look first to the back—I always notice instantly whether the back be straight and flat or round and full. Yet in that difference lies much of the elegance or lack of it in a female figure. If the back is full and the hips bulky, the waist is large, the figure has no elegance; it is, indeed, common. If you are the possessor of such blemishes to beauty you should at once set at work to remove the defects.

First, give attention to your diet. Eat much less than usual. Say reduce your diet at the beginning by one-quarter, then one-third, and after that one-half. The slimming results will soon become apparent.

But do not be satisfied with one means of securing a better back and slenderer hips. Exercise, especially in the open air. Walk, walk, walk, beginning with a short walk if you are unaccustomed to walking, and increasing the distance each day.

And if possible have recourse to massage. I have before said in this series of articles that I consider massage the first aid to beauty. It has always seemed to me a cure-all for defects in beauty. It improves the complexion, improves the figure, brightens the expression and makes more beautiful the eyes. Therefore, to give the fat back and narrow hips that are part of an elegant figure, I advise deep massage, with an astringent liquid preparation,

ANDY NON-A COLLEGE FOR MONKEYS

The Amazing Things the
Washington Scientists Are
Finding Out From Their
"Students"---That a Simian of
a Year Can Count
Better Than a Child
of Five, That They Are
NOT Imitative, That
Their Mind Is Just
Like Man's---But
They Have Less of It.

The Monkey that Is Taught to Amuse---a Different Kind of Instruction from That of the Washington College.

BY RENE BACHE.

THE GEORGE WASHINGTON UNIVERSITY, an institution of learning located at the National Capital, has started a simian annex which might be described as a college for monkeys. The establishment is under the management of Professor Charles F. Evans.

The object of the educational enterprise is not so much to instruct monkeys as to find out how much they are able to learn. Up to the present time this has been a matter very uncertain.

Accordingly, classes of monkeys have been formed. Regular lessons in arithmetic, memory testing, color reading, capacity to determine proportion and form are given in a regular kindergarten course.

At yet all the recruits obtained are not ready for formal publication, but there is enough available to overturn many of the old ideas as to the mind of monkeys.

The main conclusion drawn from the experiments so far is that monkeys have the same mind as man, only free of it. The importance of this is that same thing cannot be said of any other animal. Monkeys bear a close relationship to man physically, of course, but what remained to be found out was how close was the relationship of mentality. Some of the other more interesting conclusions are as follows:

The monkey is not an imitative animal. Its lack of ability to imitate is the greatest obstacle in teaching it anything new. In its mental processes and many of its traits, the monkey strongly reminds one of a young child. But a twelve-month-old monkey can count better than a two-year-old child.

Monkeys are able to perceive and distinguish.

The Skull of the Woolly Monkeys and Within It a Human Skull. So far Shape Is Concerned the Monkey Skull Might Hold the Brain of a Philosopher.

Rhesus monkeys from India---of peculiar species, which is a sort of link between the monkey proper and the baboon. Dr. Kinnaman has carried the educational test to an extraordinary length. As one feature of the work, he utilized a number of boxes similar to those employed by Professor Thorndike, with thirteen different kinds of fastenings, including a lift latch, a bear-down latch, a button, and even a lock and key. The problem in the last case being to put the key into the lock, turn it and get the food inside. Three string devices were also used, one of them requiring the pulling of a string to draw a receptacle containing the food into the cage.

Not only did the monkeys learn how to operate the fastenings, but they showed through practice a growing capacity to deal with new types of boxes or what not. This improvement, in fact, was very marked. Furthermore, they exhibited an increasing ability to pick out the fastenings as the essential point of difficulty in opening a box. Apparently an idea to be represented by the words project-ing-hat---something to do with it found lodgment in their minds.

More interesting, however, were trials of other kinds which followed---and of these being a test with two cans, exactly alike. On the front of one can was displayed a black card and on the other a similar card bearing a big black diamond. A bit of food was put in the latter receptacle. This was done hundreds of times, the food being always in the can with the black diamond; but neither of the monkeys could catch the idea at all. Other designs, such as four black horizontal bars, were placed on the card attached to the can containing the food, but always with the same lack of success. The animals were unable to form in their minds an association between the design and the food.

But it was different when contrivances were adopted of kind proper to stimulate to appeal to the monkey mind. The cans were arranged in a row and in place of them two glass tumblers

were used, covered with paper, one black and the other white. A bit of food was put under the black tumbler at each of a long series of trials; never under the white---the idea being to find out if the animals could be made to associate in their minds the two concepts, black and food.

The male Rhesus, first submitted to the test, chose right, wrong, right, wrong, wrong, right, right, wrong, right, then right every time. He made no more errors after that, the association being fixed. It was the same way with the female, which made a few mistakes, and then chose the black tumbler every time.

The problems of the box-fastenings were rendered more complex by attaching two or more different kinds to each door. For instance, a door might be secured with a hook, a button, a bolt, and a latch. This rendered the task of opening the receptacle vastly more difficult, of course. Nevertheless, the monkeys accomplished it, showing wonderful improvement in the speed with which they managed the combinations, and thus, short-cutting the business.

One of the tests applied to the monkeys in Washington has had to do with color. Glass tumblers were covered with paper of different pure---red, blue, yellow, and green, and another yellow, another red, and another green. These were turned upside down

white paper neatly, so as to present no differences to the eye, save in respect to shape.

A bit of food was put into the rectangular box, and in no other, through a long series of trials. The monkey, when permitted to approach, would look all of the receptacles over in a fraction of a second. Of course the order of arrangement of the boxes was changed on each occasion. It did not take the animal very long to ascertain that the rectangular box was the only one worth looking into. At first, after getting the morsel he would look into the others hopelessly, but late on he declined to take the trouble. When he hit upon the wrong receptacle, he would look into it, with hand uplifted to take the food, and, not finding the latter, would look into the next one. After the monkey had arrived at a point where he chose the right box offhand, practically every time, the food was put into another box, and with only a few preliminary errors, he would learn to pick out the new shape.

It was considered very important to find out whether monkeys could count, and if so, to what extent. For this purpose there were prepared two dozen bottles, wide-mouthed, and all exactly the same size, which were covered with white paper to prevent the animal from seeing the morsel of food in any way except by looking into it from the top. These were

set in a row on a board, four inches apart. The food was put into the fourth bottle from the right end and kept there through a series of trials until the animal under test picked it out every time. Then the morsel was put into the third bottle from the left end, or the fifth, and so on. As a result it was ascertained that the male Rhesus was able to learn to count up to six perfectly, but the female could count only up to three.

It is to be supposed that among the monkeys, as with human beings, the female is inferior to the male in respect to mathematical ability. Well, hardly that. But still the matter is most interesting. Dr. Kinnaman's conclusion is that monkeys do not really count. Probably they

TEACHING THE MONKEYS TO REASON---AN APPLE ON A GAS JET THAT COULD BE REACHED ONLY BY THE EXERCISE OF MATHEMATICAL AND GRAVITATIONAL PERCEPTION.

TEACHING THE MONKEYS TO COUNT---A ROW OF COVERED BOTTLES, ONE OF WHICH FOOD IS PUT, TAKES THE PLACE OF THE ARITHMETIC TABLES.

TEACHING REASONING AND PERCEPTION---BOXES TO BE OPENED WITH KEYS.

This Little Monkey On the Left, One Year Old, Has Been Found to Be Able to Count Better Than Any Little Girl of Five Years---Such, for Instance, as the One Pictured Here.

have a perception of quantity of plus---but here the monkey's ability to compute, rather than counting, in the proper hand numbers and numerical relations sense of the word. A child, long before probably reaches its limit, while that of it can count, perceives the difference between one thing and two things, between two and three, between three and several, and so on. It would not be surprising, suggests Dr. Kinnaman, if a clever monkey were able to distinguish from each other playing cards, from ace to ten; but the cards would be distinguished through difference of some impression, and not through perception of numbers.

Very remarkable, indeed, was the result of a competition between children and monkeys. Two children, three and five years of age, were brought before the row of tumblers just described, under exactly the same conditions as those in which the monkeys had been subjected. The only difference was that bright-colored and very desirable morsels were used, one at a time, instead of morsels of food. The older child was able to locate 2, 3 and 5, but was not sure of higher numbers. The three-year-old child failed 1 and 2, found 3 more difficult, and failed entirely on the higher numbers. Thus it would seem that monkeys attain in one year (the two experimented with by Dr. Kinnaman were about twelve months old) to a development of the reckoning faculty superior to that reached by any other of the animals under test, and that of a man, but there is much less of it.

...from any liquid surfaces evaporation is perpetually taking place; so that an ocean is being slowly and silently lifted into the air. Three stages in the inevitable parting with its hydrosphere are exemplified to-day by the earth, Mars and the moon. On the earth the sea bottoms still hold seas, on Mars they only hold ponds, on the moon they contain nothing at all.

Withdrawal of water should show in a diminution of the surface of the planet covered by the sea. Observation proves this to be a fact. With research we may assure ourselves that the depletion is in process.

...the story The land which once flowed with milk and honey came hardly to flow had water now.

Turning now to Mars, we find what is but

...fence, when it stands sharp-cut by the horizon
of the sky, unrelieved even by mountain-notch-
ing of the blue, is to realize in part what life
on it must mean. Where days and months of
travel would bring one no nearer to its edge
despair might well settle on the mind. And the
daily course, rising from out the steaming
waste only to sink again

To this condition the earth must come. Un-
steady, if stealthy, airds, Sarabhas, as we have
seen, are even now possessing themselves of its
surface. The end is doubtless yet far off, but it
is as fatalistically sure as that to-morrow's sun
will rise, unless some other catastrophe occur.
The only thing that is pleasing to learn is the
manner of our death. But science is concerned
only with the fact, and Mars we have to thank
for its prescience.

What Useful Things Can Be Made From Boxes?

**Almost the Whole House Can Be
Furnished Cheaply from Them,
One Woman Has Discovered,
and Here Are Some of the
Ways to Do It.**

The statement of conditions of life for the poorer classes of the great metropolis, those residing in the tenement houses, is a matter which has attracted the attention of philanthropists for years. The most recent advertisement to the ranks of social service workers in New York is Miss Louise Brigham, who has planned a tenement work before the public in the broadest and the most effective manner, and thereby in a degree who proposes to touch the great mass of the world's great need for people of the district how they may be bettered of the conditions of the tenement houses, noisy and pretentious, by affixing her work with city by old boxes which can be bought for a few pennies.

As an object lesson Miss Brigham has furnished her own home entirely from these cast-off articles, and there she will have her workshop where the dwellers of the tenements will come to be taught.

A number of settlement organizations in other cities have asked her to become affiliated with them and this she has decided to do as the best means of rectifying conditions in the crowded quarters of these places. She has chosen New York as a headquarters because she believes it is the centre best adapted for spreading the work.

Her flat comprises a kitchen, dining room, bedroom and living room, the four rooms necessary in any house, while the fifth serves as the studio in which Miss Brigham works. Chairs, tables, writing desk, sideboards, bookcases and numerous other articles have already been completed and ready for use. She has not only had all of the necessary furniture provided, but from the boxes numerous dainty and attractive furnishings, such as wall racks, hanging flower pots, linen box and similar conveniences, even luxuries, may be seen everywhere.

"Only a few tools are necessary for the work," said Miss Brigham. "A good saw, a plane, a hammer and a few other pieces, and one is equipped to make the average articles of furniture for the home. If one intends making a number of pieces, it is well worth while to buy the tools and good ones that will last. The tools would not be an obstacle to anyone who was really interested in fitting up a home comfortably. All is simple and plain as can be, and minute printed directions are provided for construction. It is told just how many boxes and of what kinds to procure, and just what hardware is needed. Then the boxes must be taken apart and cut into proper lengths and widths, also in accordance with instructions, and one is then ready to begin."

"One, of course, realizes that there are great possibilities in this work for the conduct of it in such a manner that the greatest good to the greatest number will result. In every great city there are thousands upon thousands of tenement house folk who would welcome the knowledge of how to do this work for themselves."

- 1 round knurled nail-set, 1-16 in. cap
- 1 iron smooth plane, No. 2
- 1 round hickory mallet, No. 4
- 1 India oil-stone, No. 28, in iron box
- 2 screw-drivers, 3 in. and 8 in.
- 1 miter-box, 18 in. long

The line drawings and the instructions are from "Box Furniture," copyright, 1906, by the Century Company.

"Instead of ugly, cheap furniture which lowers the mental and moral tone of the owners, there is by this method, a clean, simple, artistic equipment. Then, the stimulus which comes from the fact that it is the work of one's own hands must be uplifting."

- These are all the tools one needs to work with:
- 1 three-foot folding rule
- 1 side-eye claw-hammer, 16 oz
- 1 cross-cut saw, 20 in
- 1 rip-saw, 20 in
- 1 iron block plane, No. 8 1/2
- 1 hand-hammer, 4 oz
- 1 drawing-knife, 8 in. blade
- 1 hand-saw, 10 in
- 2 Finer-chisels, 3/4 in. and 1/2 in
- 2 gouges, 3/4 in. and 1/2 in
- 1 Sloyd knife, No. 7
- 1 brace, 8 in
- 1 auger-bit, 1/4 in., 3/8 in., and 1 in
- 1 iron pad key-hole-saw, No. 2
- 1 pair winged dividers, 8 in
- 1 hand-saw, 1 1/2 in

How a Pretty Shirt Waist Box Is Made.

A Greek Cross Table That Costs Almost Nothing.

The Whole Kitchen Can Be Equipped With Them.

Some Ways to Use the Boxes.

A Window Seat.

ONE can make a practical window seat by combining two boxes and plant stands having slots cut across in the backs of each to receive the ends of a portable seat, which is supported at its center by a box. As the individual pieces forming the window seat receive support or rest upon each other, they may easily be assembled or removed as desired. The box support compartment makes a convenient receptacle for covers and pillows, when not in use, and can be readily withdrawn, as the seat merely rests upon it.

The materials required are four soap boxes, about 10 1/2 inches deep, 14 1/2 inches wide and 20 inches long. One box of the same width and depth, but four inches shorter, and pieces of wood 1/2 inch thick, 4 inches wide and 8 inches longer than the inside box. For the arms, four pieces of wood 1/2 inch thick, 3 inches wide and 8 inches longer than the

outside depth of the box will be required. Right pieces of wood 1/2 inch thick, 3 inches wide, by 3 inches shorter than the outside depth of the box will be needed for the facing strips. Four strips of wood 1/2 inch thick, 1 1/2 inches wide, and 4 inches longer than outside width of box, and four strips 1/2 inch thick, 1 1/2 inches wide, 4 inches longer than outside width of box, will answer for the legs of the seat. The legs will require right strips of wood 1/2 inch thick, 1 1/2 inches wide, and 3 inches longer than twice the outside width of the box, and eight strips 1/2 inch thick, 2 inches wide, and 3 inches longer than twice the outside width of the box. The seat consists of one piece of wood 1/2 inch thick, 3 inches narrower than the outside length of the box, about 28 inches longer than the window seat. For inside, two pieces of wood 1/2 inch thick, 4 inches wide, and as long as the seat will be needed.

A slot 1 inch high is cut in the back of each stand, extending from leg to leg so that each end of the seat will pass through the slot and project 3 inches inside, resting upon the bottom of the upper compartment. The seat can be made of two boards held together by nails nailed across them on their under side.

A Nature Study Stand. THIS is a refining and educational influence and is easily made. The space between the upper and lower compartments is enclosed with wire mesh. The upper compartment contains an ordinary glass aquarium. For the body, the following materials are required: Two cereal boxes, each about six inches deep, seventeen and one-half inches wide, and twenty-three inches long, and four soap boxes, about four inches deep and four inches wide. For the doors, two strips of wood, each half an inch thick, two

being closed. The drawers extend through, with pull knobs on both ends. The leaves are hinged and fold. When in use leaves are held up by swivel arms secured to under side of table top. The materials required include one packing box, about 10 inches square and 25 inches long, and two cereal boxes; the top is made out of a piece of wood 1/2 of an inch thick and 18 inches square. Two pieces of wood, 1/2 of an inch thick and 37 1/2 inches square, are required for the drawers. Four pieces of wood, 1/2 of an inch thick, 7 inches wide and 18 inches long, are needed for the leaves; two pieces, 1/2 of an inch thick and 14 inches wide, and 17 1/2 inches long, for the shelf separator. Four pieces, 1/2 of an inch thick, 14 inches wide and 8 inches long for the arms, and four 8 inches wide and 14 inches long for the top, stand upon its legs and are held up by the top, allowing the

A Servicable Bedroom Stand.

being closed. The drawers extend through, with pull knobs on both ends. The leaves are hinged and fold. When in use leaves are held up by swivel arms secured to under side of table top. The materials required include one packing box, about 10 inches square and 25 inches long, and two cereal boxes; the top is made out of a piece of wood 1/2 of an inch thick and 18 inches square. Two pieces of wood, 1/2 of an inch thick and 37 1/2 inches square, are required for the drawers. Four pieces of wood, 1/2 of an inch thick, 7 inches wide and 18 inches long, are needed for the leaves; two pieces, 1/2 of an inch thick and 14 inches wide, and 17 1/2 inches long, for the shelf separator. Four pieces, 1/2 of an inch thick, 14 inches wide and 8 inches long for the arms, and four 8 inches wide and 14 inches long for the top, stand upon its legs and are held up by the top, allowing the

A Combination Bookcase and China Closet.

being closed. The drawers extend through, with pull knobs on both ends. The leaves are hinged and fold. When in use leaves are held up by swivel arms secured to under side of table top. The materials required include one packing box, about 10 inches square and 25 inches long, and two cereal boxes; the top is made out of a piece of wood 1/2 of an inch thick and 18 inches square. Two pieces of wood, 1/2 of an inch thick and 37 1/2 inches square, are required for the drawers. Four pieces of wood, 1/2 of an inch thick, 7 inches wide and 18 inches long, are needed for the leaves; two pieces, 1/2 of an inch thick and 14 inches wide, and 17 1/2 inches long, for the shelf separator. Four pieces, 1/2 of an inch thick, 14 inches wide and 8 inches long for the arms, and four 8 inches wide and 14 inches long for the top, stand upon its legs and are held up by the top, allowing the

The Boxes Transformed Into a Hall Rack.

being closed. The drawers extend through, with pull knobs on both ends. The leaves are hinged and fold. When in use leaves are held up by swivel arms secured to under side of table top. The materials required include one packing box, about 10 inches square and 25 inches long, and two cereal boxes; the top is made out of a piece of wood 1/2 of an inch thick and 18 inches square. Two pieces of wood, 1/2 of an inch thick and 37 1/2 inches square, are required for the drawers. Four pieces of wood, 1/2 of an inch thick, 7 inches wide and 18 inches long, are needed for the leaves; two pieces, 1/2 of an inch thick and 14 inches wide, and 17 1/2 inches long, for the shelf separator. Four pieces, 1/2 of an inch thick, 14 inches wide and 8 inches long for the arms, and four 8 inches wide and 14 inches long for the top, stand upon its legs and are held up by the top, allowing the

The Simplest Tools Only Are Necessary.

inches wide, and fourteen and one-half inches long, and two strips one-half inch thick, two inches wide, and twenty inches long. For the legs, four pieces of wood are required, one-half inch thick and five inches square. A piece of wire or screen twenty inches wide and five feet long is used in the space between the upper and lower compartments. Twenty-one one-half inch brass butts, one brass pool knob, and one brass button constitute all the hardware required.

A Greek Cross Tea Table.

A GREEK CROSS tea table is the most convenient for small spaces. The two drawers are used for holding spoons or silver, or as trays for serving. The lower compartment is open on opposite sides, the other two are

strips, 1/2 of an inch thick, 1 1/2 inches wide and 25 inches long for the legs. The hardware required consists of four small brass knobs and four screws 1/4 inch in diameter and 1/4 inches long.

A Hall Stand.

A USEFUL hall stand can be made out of three condensed milk boxes 17 1/2 x 13 inches deep and 10 1/2 in. long; three butter tins 12 1/2 inches deep, 11 inches wide and 20 inches long, and one galvanized box 34 inches deep, 10 1/2 inches wide and 18 inches long for the body of the article. For the drawer a clear box 2 1/2 inches deep, 14 inches wide and 18 inches long may be used.

For the legs there will be needed two strips 1/2 inch thick, 2 inches wide, 3 feet 10 inches long, two strips 1/2 inch thick, 2 1/2 inches wide, 3 feet 10 inches long, two strips 1/2 inch thick, 2 inches wide, and 27 inches long. For the intermediate strips, two strips 1/2 inch thick, 2 1/2 inches wide, and 27 inches long, and one galvanized box 34 inches deep, 10 1/2 inches wide and 18 inches long. For the body of the article, for the intermediate strips, two strips 1/2 inch thick, 2 1/2 inches wide, and 27 inches long, and one galvanized box 34 inches deep, 10 1/2 inches wide and 18 inches long. THE RELENTLESS HOODOO OF THE HOPE DIAMOND

What the Hoodoo Has Done.

Andreas Tavernier, who sold the diamond to Louis XIV.—to pieces by dogs.
Madame de Montespan, who wore the jewel—abandoned by the King.
Nicholas Fouquet, Intendant of France, who borrowed it—beheaded.
Marie Antoinette, who begged it—beheaded.
Princess de Lamballes, who wore it—torn to pieces by a French mob.
Louis XVI, who owned it—beheaded.
Wilhelm Fals, who recut it—ruined.
Hendrik Fals, his son, who stole it—a suicide.
Francis Beaulieu, who sold it—died in misery and want.
First Lord Hope, who bought it—suffered a long series of misfortunes, including death of favorite son.
Lord Francis Hope, his grandson—financial reverses, scandal, and unhappy marriage.
May Yohe, his wife, who wore it—scandal and unhappiness.
Simon Frankel, New York broker who bought it—financial difficulties.
Jacques Colot, next owner—madness and suicide.
Prince Ivan Kanitovski, next owner—killed by revolutionists.
Lorenz Ladue, to whom he loaned it—murdered by lover.
Simon Montherdard, who sold it to the Sultan—thrown over a precipice while riding with his wife and child; all killed.
Abu Sabir, who polished it—tortured and imprisoned.
Kulub Bey, who guarded it—hanged in the street by a Turkish mob.
Keeper of its vault—strangled.
Zubayba, the Sultan's favorite—killed by her master.
Abdul Hamid, its last owner—dethroned.

Princess de Lamballes Was slain.

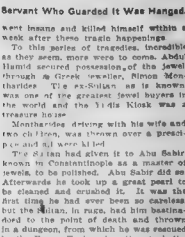

The Sultan's Favorite Was Shot.

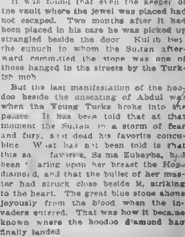

Son of Weller Killed Himself.

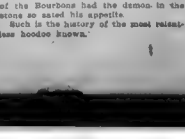

Servant Who Guarded It Was Hanged.

May Yohe, the Divorced Wife of Lord Hope, Once Owner of the Stone.

Zubayba, the Sultan's Favorite, Who Was Killed by Him While Wearing the Diamond.

ABDUL HAMID, ex-Sultan of Turkey, it has just leaked out, is the last man to have owned the famous blue Hope Diamond. He bought it eight months ago. Within half a year he was dethroned, and now his life hangs upon a very slender thread. Indeed, when the Young Turks broke into the Yildiz Kiosk, they found the emperor crouching in a chair holding a smoking revolver in his hand. On the floor lay the body of Zubayba, his favorite. On her breast sparkled the blue diamond, having itself in her blood. Her master, 18 feet and rarer, had shot her through the heart.

This last incident gives the gem a record of two dynasties destroyed in which its spell was interwoven—that of Abdul Hamid and that of the old French monarchy. Marie Antoinette wore it gleaming on her white neck not many months before the guillotine fell upon its stenderess. Between the fall of the old regime and that of the Sultan it has left a trail of madness, murder, suicide, bankruptcy and misfortune. Its story from the time it was taken from the crypt where it had been for generations, has been one of bloodshed.

Its latest history began in the middle of the seventeenth century, when Andreas Tavernier, a French traveler and merchant, bought or stole it in India, where it had been part of a temple treasure and brought it to France. Tavernier sold it to Louis the Fourteenth. Soon after he was torn to pieces by wild dogs in Spain.

The Great Louis had the stone cut and polished, and it became a part of the crown jewels. The beautiful Marquise de Montespan was then wearing the affection of the blue. Her ascendancy was unquestioned. It appears that she covered the diamond, and that the royal loven wore it.

Marie Antoinette on the Way to the Guillotine. She Wore the Jewel Whose Spell Is Intertwined with the Fate of the Bourbons.

was a thien star. Madame de Montespan, became the real Queen of France. Fouquet, that dashing and romantic Intendant of finance of the fourteenth Louis, borrowed it for one of those fetes of his that at last roused the jealousy of Louis. Fouquet on the old records showed it and kept it for some time. Two years after Fouquet lost his head.

It lay in a crypt during the reign of the fifteenth Louis, during the Regency of Louis XV. Marie Antoinette had become Queen of France. Apparently it had been forgotten. Then, one day, the Austrian heard of the existence of this beautiful gem. The sixteenth Louis commanded that it be given to her. She wore it about her throat at a great ball at the Tuileries. It was a very beautiful stone of the Revolution that were already licking heavenward. The Princess de Lamballes, Marie Antoinette's bosom friend, coveted it and wore it for a stage. Not so long after the Princess de Lamballes was torn to pieces by the Paris mob and the neck on which the diamond had glinted was paraded in front of the Bourbon's prison window. And not long after the Queen herself went to the guillotine.

With the death of Louis under the same blade, the great diamond disappeared. It had been placed in the Griefs under that time. Thereafter she fled, with the other crown jewels, to Spain.

The jewel next sanctified in the hands of an English broker named Wall. Wall seems to have been immune from its spell. At any rate nothing is known of what it did to him. Almost at once he sold it to Simon Frankel, head of a firm of stationers in New York. Frankel, in 1894, was one of the sensation of American and English society. Soon after he became hair his wife stopped with Putnam Braden Buring and the scandal was immense. Lord Francis was fast running to the verge of bankruptcy. At last he reached there. Then the court released and allowed Hope to sell the diamond.

At once the spell seemed removed from Hope. He secured his divorce from May Yohe, his former improved, he married a charming English girl and now, recast from which a man seemed to have been removed. May Yohe herself attributed all her misfortunes to the influence of the diamond.

family misfortune came. His son died, and when the old man passed away the gem went into the hands of the prodigal grandson, whose marriage with May Yohe, the actress, in 1894, was one of the sensation of American and English society. Soon after he became hair his wife stopped with Putnam Braden Buring and the scandal was immense. Lord Francis was fast running to the verge of bankruptcy. At last he reached there. Then the court released and allowed Hope to sell the diamond.

At once the spell seemed removed from Hope. He secured his divorce from May Yohe, his former improved, he married a charming English girl and now, recast from which a man seemed to have been removed. May Yohe herself attributed all her misfortunes to the influence of the diamond.

government refused to make any effort to recover it. Some time after another Hollander, Wilhelm Fals, sought the protection of the Amsterdam police. He said that he had been commissioned to cut a great blue diamond, had done so and that he had had stolen it from him, and had run away. Since then, he said, his life had been constantly menaced and that he had become penniless. There is little doubt that this man cut the crown jewel and afterward became the Hope diamond and that the hoodoo had followed him and the thief, as it had the greater performer who had possessed it.

Began then the career of the stone as the Hope diamond. It passed to it to an English banker, Henry Thomas Hope, grandfather of the present Lord Francis Hope. Almost from the first the spell began to work with the banker. His business did not fail but a succession of

may have been noted with blood; at any rate, it vanished. It was not until 1890, forty years later that it reappeared. It was then in the possession of an English dealer named Daniel Elison. The gem had been used to reader its identification reduced in size—almost one-half. Elison told a curious story. He had been summoned, he said, to a small house in Soho. There he had found a man in the last stages of bungee and consumption, who had offered him the gem. This man told him that he had been given it by a friend, who had soon after committed suicide. He had been afraid to offer it for sale, or even show it. The careful dealer took the name of the man who had the stone. He was a Frenchman, Francis Beaulieu, he said, a native of Marseilles. The friend who had committed suicide was a Hollander, Hendrik Fals. This man, he said, had been a jeweler's assistant in Amsterdam. He would tell nothing else. Elison paid the price asked and took the diamond. The next day he returned to the house to which he had found the seller dead of starvation. It soon became known that the owner had died. He had resorted, but, strangely enough, the French

servant who guarded it was hanged. He was hanged and killed himself within a week after the death of his master. To the series of tragedies, incredible as they seem, more were to come. Abdul Hamid secured possession of the jewel through a Greek jeweler, Simon Montherdard. It is known as to known, was one of the greatest jewel buyers in the world and the Yildiz Kiosk was a treasure house. Montherdard, during with his wife and ten children, was thrown over a precipice and all were killed. The jewel had given it to Abu Sabir, known in Constantinople as a master of jewels, to be polished. Abu Sabir did so. Afterward he took up a great pearl to be cleaned and crushed it. It was the first time he had ever been so careless, but the Sultan, in fact, had him beheaded to the point of death and thrown in a dungeon, from which he was rescued by the Young Turks when they took the palace. It was found that even the keeper of the vault where the jewel was placed had not escaped. Two months after it had been placed in his care he was placed over Jewellers in New York. From this time the search to whom the Sultan afterward committed the stone was one of those handed in the streets by the Turkish mob. But the last manifestation of the hoodoo beside the unveiling of Abdul was when the Young Turks broke into the palace. It has been told that at that moment the Sultan in a storm of fear and fury, shot dead his favorite concubine. What has been told is that this as a failure. As Ma Zubayba, had been a ring upon her breast the Hope diamond, and that the bullet of her master had struck close beside it, striking to the heart. The great blue stone alone joyously from the blood when the invaders entered. That was how it became known where the hoodoo diamond had finally landed. The Abdul Hamid, begging for his life, went into captivity. Not since the fall of the Bourbons had the diamond, the stone so saved his appetite. Such is the history of the most renowned blue hoodoo known.

To complete the circle of fate, the broken, blue hoodoo knows.

The Scarf of
the Eighteenth

and
Barbaric
Ornamentation.

[illegible]

The vogue of the scarf began of course with this狄多尔伐 revival, and the costumes of the Directory were copied—so nearly as the daring ladies of that period could accomplish it—after classic ideals. One of these classic features was the floating scarf, which in delicately harmonious coloring is always a prominent part of mural decorations showing Greek feminine figures.

Indeed, considering the rare possibilities of effective posing with the simplest draping, it seems strange that this article of attire should ever have been allowed to lapse into fashionable disrepute.

It is said that the fashionable fairies are buried up to their pompadour noses, searching through art tomes and photographic catalogues for picturesque scenery. They are, however, not without a certain good-bye attitude or resistance as H. Werns, an individual here as her peculiar sachet or the monogram on her stationery. Of course all the really good scarf poses are fast being taken and nobody wants to be left out. The most popular of the stamped ideas: The Rembrandt, Sans Genes, De Stael, La Bruns, Toucan and other familiar beauty poses that stand on every side of one are fairly bewildering, and one notes approvingly that most of the poses are skillfully new, but that the very best points of the scarf are still the same.

For example, if one has a pretti-
back there is the butterfly scarf, which
keeps a draught from the nape of the
neck, but does not unkindly cover up
dimpled shoulders. And if one pos-
sesses a lovely pair of arms or a fair
neck there is the sumptuous Byzantine
scarf of gold net which is really a scarf
yet "leaves nothing beneath to the
imagination. Both of these scarfs are
shown among the illustrations. The
butterfly scarf takes its name from the
little shaped piece which joins the two
long ends and the Byzantine scarf of
gold net is richly embroidered with
white ribbon flosses and gold threads.

One sees also the stately Recamier and the winding Burne-Jones lady with long, lithe limbs intertwined and her limp scarf clinging to the outlines of her shoulders, arms and hip. The scarf is

Unnecessary, and Proves It.

The intense interest in the wonderful work that is being accomplished in skin and hair care and cures at the Cray Research Institute of the Lehigh University, continues unabated. Many years' standing have been remedied by the use of the preparation being distributed from the Cray Research Institute and its fame is spreading far and wide. This remarkable hair food with gratifying results in this treatment more popular is the fact that free trial orders can be obtained by request from those who wish to try it are strongly advised to write to Cray Research Institute, 325 Baltimore, Baltimore, Md. They will receive the trial bottle and the information about the hair, which will put them on the road to a rapid and permanent treatment.

place of corset. Miss Mary Garden, it is whispered, owes her supple, sinuous figure to the chifon corset which is swathed about it. The corset-scarf, too, is a new thing, and is worn in something after the manner in which a West Point cadet winds himself up in his mask. One begins at the bottom and works upward, keeping the folds quite close to the body, and then, as the loosening them just beneath the bust.

A turn over the shoulder and around the arm holds up the chifon corset so that it will not fall down. The figure is a figure of eight, of course, is to adjust the long scarf evenly and correctly with the tightness and looseness in the right places. She who ties one end of the scarf around her neck, and the silk, to the bodice and the rolls herself up in it will be apt to look like a saddled mummy done up in a bandage.

At the theatre the corset plays a part in the new drama of fashion, and this tale is its first appearance in the

The Odd

WHEN you are in Rome, you must be named as the Romans are. That seems to be the idea of the change of names throughout the coun-

try in a recent year.

In the constantly increasing flow of migration from the Soviet Union, there are many who desire to adapt themselves to the conditions of their adopted country in every possible way. The Legislatures of particular States, therefore, have the duty to means whereby those who wish to change their names may do so upon presenting satisfactory reasons, and to fail to take advantage of the opportunity afforded to expedite their assimilation in this respect.

There is one name known as *Lesnyanski* in Russia, where the name may possibly be pronounced without resulting in permanent injury to the speaking facial features, but this country's laws are simply designed to instantly alter and more desirable

A change of this kind is easily accomplished. A petition is drawn up setting forth the odious name and the new one proposed and the reason for the desired change, and is presented to the proper authorities.

If the application is looked upon favorably—and unless some ulterior motive or capricious notion is disclosed such applications are usually granted as a matter of course—order is given to publish the change. Notice of the change is generally required to be published in some local

Newspaper designated by the court.

In New York a complete list of the names changed in 1974 is available. It is published in the annual volume of session laws passed by the State Legislature, and makes interesting reading.

Looking through these lists at random, one may obtain a fair idea of the various reasons which induce people to change their names.

Called "Sweet" - name, a rose named as sweet, as Shakespeare assures us, but called by any other name a Rosenzinsky will sound much sweeter.

For most of the names are changed for business reasons. It is indicated by the fact that ninety per cent of the applications are made by men, and only one per cent for change of such names.

Long and unwieldy surnames are usually simplified by removing a section off the end, and taking the first syllable. Kinsley; Schliansky; to Shill; Jarnowsky to Jar-now; Berdichevsky to Berdy, Lempiatsky to Lempi. Obozrensky to Odozren. Dremansky to Dremann. Sometimes, however, the same object is attained by cutting "a little bit off the top," as, for instance, Gradatinsky to Gradat. Shilsky and, strikingly enough, Nighdant to Berde.

Why True Love

It is a popular fallacy among those that lovers are bound to be sincere or later; as that such restraints ought not to be put on the love that strengthens the bond between the parties.

Such a belief can only be due to a lack of understanding of the people actually in love. Quorra is always avoided, because no how delightful may be the joys of love, the joys of the life of the soul, and slowly, but surely, will figure the ideal of true affection.

Quorra between lovers united from the trifling makers, and have been known to purposely their sweethearts simply for the sake of the time that they spend when a couple do kiss and make good deal of affection is lavished on the other side, of course, and the time that they spend

SUNDAY-AMERICAN-EXAMINER-

Nº 8412 PATTERNS

A DAINTY ONE-PIECE DRESSING SACQUE FOR MISSES OR SMALL WOMEN EASILY MADE AT HOME.

PINK covered craps de chins or Dresden figured taffeta will develop this design most charmingly. A trimming of velvet or satin ribbon is effective. The design is cut with body and sleeve in one, and the fronts are slashed at the sides.

The pattern is cut in three sizes—14, 16 and 18 years, and is arranged for high or low neck opening.

To obtain this pattern, fill out the accompanying coupon carefully and mail with 10 cents in silver or stamps to DRESSING SACQUE, Post Office Box 250, New York City.

IMPORTANT NOTICE.

Send 10 cents in silver or stamps for The American-Examiner 1900 Fashion Catalogue, containing over 600 designs of ladies' misses' and children's patterns. No home dressmaker should be without one of these catalogues.

PA, EXCUSE ME
I DIDN'T MEAN IT
FOR YOU

I SHALL NEVER DARKEN
YOUR DOORS AGAIN WHILE
THAT FIEND IS
THERE

OH, FATHER

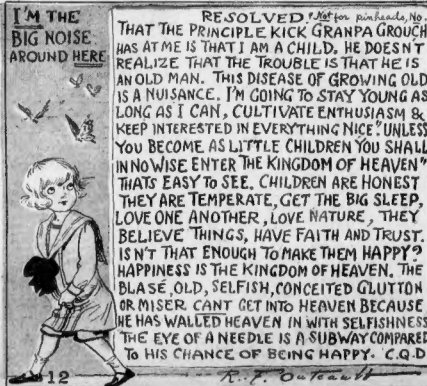

OUCH!

YOU'RE
GUILTY
I THINK GRANDPA
IS GUILTY
YOU'RE
IT, PA

JURY

JUSTICE GOES HERE.
NO GUESSING OR SHAKING THE
BOX TO SEE WHO WINS

I'M THE
BIG NOISE
AROUND HERE

RESOLVED. Not for pinheads. No. HAS AT ME IS THAT I AM A CHILD. HE DOESN'T REALIZE THAT THE TROUBLE IS THAT HE IS AN OLD MAN. THIS DISEASE OF GROWING OLD IS A NUISANCE. I'M GOING TO STAY YOUNG AS LONG AS I CAN, CULTIVATE ENTHUSIASM & KEEP INTERESTED IN EVERYTHING NICE. UNLESS YOU BECOME AS LITTLE CHILDREN YOU SHALL IN NO WISE ENTER THE KINGDOM OF HEAVEN. THAT'S EASY TO SEE. CHILDREN ARE HONEST THEY ARE TEMPERATE, GET THE BIG SLEEP, LOVE ONE ANOTHER, LOVE NATURE, THEY BELIEVE THINGS, HAVE FAITH AND TRUST. ISN'T THAT ENOUGH TO MAKE THEM HAPPY? HAPPINESS IS THE KINGDOM OF HEAVEN. THE BLASE OLD, SELFISH, CONCEITED GLUTTON OR MISER CAN'T GET INTO HEAVEN BECAUSE HE HAS WALLED HEAVEN IN WITH SELFISHNESS. THE EYE OF A NEEDLE IS A SUBWAY COMPARED TO HIS CHANCE OF BEING HAPPY. C.Q.D.
